JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 471

Adsorption
Electrochemical surface reactions of intermediates formed in the oxidative ethanol adsorption on porous Pt and PtRu, 167
Structural identifiability of adsorption and electron transfer processes in metal dissolution and passivation mechanisms, 1
Alcohol sensor
An electrochemical alcohol sensor based on a co-electrodeposited Pt | WO_3 electrode, 151
Alkaline medium
Electrocatalytic oxidation of methanol at a nickel hydroxide/glassy carbon modified electrode in alkaline medium, 89
Anion sorption
Direct experimental evidence proving the formation of surface layers in the course of the reduction of Cr(VI) species at a gold electrode, 73
Aqueous electrolyte
Electrochemical oxidation of pyrite (FeS_2) in aqueous electrolytes, 116
Association constant
Conductivity study on lithium bromide in propylene carbonate + acetonitrile mixtures in dilute solutions from −35 to 75°C, 78
Au(100) surface
On the stability of unreconstructed Au(100)-(1 × 1) at negative potentials in aqueous sulfate solution, 9
Azocrowns
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156

Biomedical implant alloys
Study of the corrosion behavior of titanium and some of its alloys for biomedical and dental implant applications, 109

Carbon monoxide
A temperature controlled cell for in situ infrared spectroelectrochemical measurements and its use in the study of CO isothermal desorption, 146
Catalysis
Studies on the catalytic reduction of iodate at glassy carbon electrodes modified by molybdenum oxides, 37
CFC-12
Electrochemical reduction of dichlorodifluoromethane in acetonitrile medium to useful fluorinated compounds, 26
Charge transfer coefficient–potential variation
The voltammetric reduction of some benzenesulfonyl fluorides, simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14
Chloride attack
Current oscillations induced by chlorides during the passive–active transition of iron in a sulfuric acid solution, 132
Chromium
Analysis of the temperature dependence of the α and β coefficients of the electrode reactions in the Cr(III)/Cr(II) and Cr(II)/Cr(Hg) systems, 62
Cobalt
Enhanced stability and electrocatalytic activity of a ruthenium-modified cobalt–hexacyanoferrate film electrode, 42
Complex current oscillations
Current oscillations induced by chlorides during the passive–active transition of iron in a sulfuric acid solution, 132
Crown ethers
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156
Cr(VI)
Direct experimental evidence proving the formation of surface layers in the course of the reduction of Cr(VI) species at a gold electrode, 73
Cyclic voltammetry
Electropolymerization of 2-methoxy aniline. Electrochemical and spectroscopical product characterization, 180
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156
Solid-state electrochemical investigation of poly[2-methoxy, 5-(2′-ethyl-hexyloxy)-1,4-phenylene vinylene], 32
The voltammetric reduction of some benzenesulfonyl fluorides, simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14
Cytochrome c_3
Electrocatalytic reduction of uranium by bacterial cytochromes: biochemical and chemical factors influencing the catalytic process, 96

Desorption
A temperature controlled cell for in situ infrared spectroelectrochemical measurements and its use in the study of CO isothermal desorption, 146
Deuterium
The study of hydrogen sorption in palladium limited volume electrodes (Pd-LVE): I. Acidic solutions, 190
Dichlorodifluoromethane
Electrochemical reduction of dichlorodifluoromethane in acetonitrile medium to useful fluorinated compounds, 26
Diffusion impedance
Linear diffusion impedance. General expression and applications, 126
Difluoromethane
Electrochemical reduction of dichlorodifluoromethane in acetonitrile medium to useful fluorinated compounds, 26
Digital simulation
The voltammetric reduction of some benzenesulfonyl fluorides, simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14

ECE mechanism
The voltammetric reduction of some benzenesulfonyl fluorides,

PII: S0022-0728(99)00314-9

simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14
EIS
Linear diffusion impedance. General expression and applications, 126
Study of the corrosion behavior of titanium and some of its alloys for biomedical and dental implant applications, 109
E-isomers
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156
Electrocatalysis
Electrocatalytic reduction of uranium by bacterial cytochromes: biochemical and chemical factors influencing the catalytic process, 96
Enhanced stability and electrocatalytic activity of a ruthenium-modified cobalt–hexacyanoferrate film electrode, 42
Electrocatalyst
An electrochemical alcohol sensor based on a co-electrodeposited $Pt \mid WO_3$ electrode, 151
Electrochemical annealing
On the stability of unreconstructed Au(100)-(1×1) at negative potentials in aqueous sulfate solution, 9
Electrochemical behaviour
Solid-state electrochemical investigation of poly[2-methoxy, 5-(2′-ethyl-hexyloxy)-1,4-phenylene vinylene], 32
Electrochemical impedance spectroscopy
Electropolymerization of 2-methoxy aniline. Electrochemical and spectroscopical product characterization, 180
Electrochemical oxidation
Electrochemical oxidation of pyrite (FeS_2) in aqueous electrolytes, 116
Electrochemical reduction
Electrochemical reduction of dichlorodifluoromethane in acetonitrile medium to useful fluorinated compounds, 26
Electrodeposition
An electrochemical alcohol sensor based on a co-electrodeposited $Pt \mid WO_3$ electrode, 151
Electrode reaction
Analysis of the temperature dependence of the α and β coefficients of the electrode reactions in the Cr(III)/Cr(II) and Cr(II)/Cr(Hg) systems, 62
Electrolyte conductivity
Conductivity study on lithium bromide in propylene carbonate + acetonitrile mixtures in dilute solutions from −35 to 75°C, 78
Electron transfer
Structural identifiability of adsorption and electron transfer processes in metal dissolution and passivation mechanisms, 1
Electropolymerization
Electropolymerization of 2-methoxy aniline. Electrochemical and spectroscopical product characterization, 180
Electroreduction
The voltammetric reduction of some benzenesulfonyl fluorides, simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14
EQCM
Direct experimental evidence proving the formation of surface layers in the course of the reduction of Cr(VI) species at a gold electrode, 73

Finite surface strain
The Shuttleworth equation for a finite surface strain, 105
Fourier transform infrared spectroscopy (FTIR)
Electrochemical oxidation of pyrite (FeS_2) in aqueous electrolytes, 116

Glassy carbon
Electrocatalytic oxidation of methanol at a nickel hydroxide/glassy carbon modified electrode in alkaline medium, 89
Gold
Direct experimental evidence proving the formation of surface layers in the course of the reduction of Cr(VI) species at a gold electrode, 73

Hydrogen
The study of hydrogen sorption in palladium limited volume electrodes (Pd-LVE): I. Acidic solutions, 190

Inorganic film
Enhanced stability and electrocatalytic activity of a ruthenium-modified cobalt–hexacyanoferrate film electrode, 42
Iodate
Studies on the catalytic reduction of iodate at glassy carbon electrodes modified by molybdenum oxides, 37
Iron electrodissolution
Current oscillations induced by chlorides during the passive–active transition of iron in a sulfuric acid solution, 132
IR spectroscopy
A temperature controlled cell for in situ infrared spectroelectrochemical measurements and its use in the study of CO isothermal desorption, 146
Isomer recognition
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156
Isotropic electrode
The Shuttleworth equation for a finite surface strain, 105

Lability
Lability criteria for metal complexes in micro-electrode voltammetry, 55
Limited volume electrodes (LVE)
The study of hydrogen sorption in palladium limited volume electrodes (Pd-LVE): I. Acidic solutions, 190
Lithium bromide
Conductivity study on lithium bromide in propylene carbonate + acetonitrile mixtures in dilute solutions from −35 to 75°C, 78
Local active areas
Current oscillations induced by chlorides during the passive–active transition of iron in a sulfuric acid solution, 132
Luminescent conjugated polymer
Solid-state electrochemical investigation of poly[2-methoxy, 5-(2′-ethyl-hexyloxy)-1,4-phenylene vinylene], 32

Mercury microelectrodes
Preparation and characterization of Nafion® coated sphere-cap mercury microelectrodes, 48
Metal complex
Lability criteria for metal complexes in micro-electrode voltammetry, 55
Metal passivation
Structural identifiability of adsorption and electron transfer processes in metal dissolution and passivation mechanisms, 1
Methanol oxidation
Electrocatalytic oxidation of methanol at a nickel hydroxide/glassy carbon modified electrode in alkaline medium, 89
Micro-electrode
Lability criteria for metal complexes in micro-electrode voltammetry, 55
Modified electrode
Electrocatalytic oxidation of methanol at a nickel hydroxide/glassy carbon modified electrode in alkaline medium, 89
Enhanced stability and electrocatalytic activity of a ruthenium-modified cobalt–hexacyanoferrate film electrode, 42

Studies on the catalytic reduction of iodate at glassy carbon electrodes modified by molybdenum oxides, 37
Molybdenum oxide
Studies on the catalytic reduction of iodate at glassy carbon electrodes modified by molybdenum oxides, 37
Monolayers
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156
Multi-electron transfer reaction
The voltammetric reduction of some benzenesulfonyl fluorides, simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14

Nafion®
Preparation and characterization of Nafion® coated sphere-cap mercury microelectrodes, 48
Nickel
Electrocatalytic oxidation of methanol at a nickel hydroxide/glassy carbon modified electrode in alkaline medium, 89

Palladium
The study of hydrogen sorption in palladium limited volume electrodes (Pd-LVE): I. Acidic solutions, 190
Passivation
Study of the corrosion behavior of titanium and some of its alloys for biomedical and dental implant applications, 109
Passive–active region
Current oscillations induced by chlorides during the passive–active transition of iron in a sulfuric acid solution, 132
Platinum
An electrochemical alcohol sensor based on a co-electrodeposited Pt | WO_3 electrode, 151
Electrochemical surface reactions of intermediates formed in the oxidative ethanol adsorption on porous Pt and PtRu, 167
Platinum ruthenium alloys
Electrochemical surface reactions of intermediates formed in the oxidative ethanol adsorption on porous Pt and PtRu, 167
Polymer modified electrodes
Preparation and characterization of Nafion® coated sphere-cap mercury microelectrodes, 48
Poly(2-methoxyaniline)
Electropolymerization of 2-methoxy aniline. Electrochemical and spectroscopical product characterization, 180
Propylene carbonate + acetonitrile mixtures
Conductivity study on lithium bromide in propylene carbonate + acetonitrile mixtures in dilute solutions from −35 to 75°C, 78
Pt | WO_3
An electrochemical alcohol sensor based on a co-electrodeposited Pt | WO_3 electrode, 151
Pyrite (FeS_2)
Electrochemical oxidation of pyrite (FeS_2) in aqueous electrolytes, 116

Radiotracer technique
Direct experimental evidence proving the formation of surface layers in the course of the reduction of Cr(VI) species at a gold electrode, 73
Reduction
Direct experimental evidence proving the formation of surface layers in the course of the reduction of Cr(VI) species at a gold electrode, 73
Reproducibility
An electrochemical alcohol sensor based on a co-electrodeposited Pt | WO_3 electrode, 151
Ruthenium
Enhanced stability and electrocatalytic activity of a ruthenium-modified cobalt–hexacyanoferrate film electrode, 42

Shuttleworth equation
The Shuttleworth equation for a finite surface strain, 105
Sorption in palladium
The study of hydrogen sorption in palladium limited volume electrodes (Pd-LVE): I. Acidic solutions, 190
Spectroscopy
Electropolymerization of 2-methoxy aniline. Electrochemical and spectroscopical product characterization, 180
Structural distinguishability
Structural identifiability of adsorption and electron transfer processes in metal dissolution and passivation mechanisms, 1
Structural identifiability
Structural identifiability of adsorption and electron transfer processes in metal dissolution and passivation mechanisms, 1
Sulfonyl fluoride
The voltammetric reduction of some benzenesulfonyl fluorides, simulation of the ECE mechanism and determination of the potential variation of the transfer coefficient by using the compounds with two reducible groups, 14
Surface reaction
Electrochemical surface reactions of intermediates formed in the oxidative ethanol adsorption on porous Pt and PtRu, 167
Surface reconstruction
On the stability of unreconstructed Au(100)-(1 × 1) at negative potentials in aqueous sulfate solution, 9

Temperature
Analysis of the temperature dependence of the α and β coefficients of the electrode reactions in the Cr(III)/Cr(II) and Cr(II)/Cr(Hg) systems, 62
A temperature controlled cell for in situ infrared spectroelectrochemical measurements and its use in the study of CO isothermal desorption, 146
Tetrafluoroethylene
Electrochemical reduction of dichlorodifluoromethane in acetonitrile medium to useful fluorinated compounds, 26
Thin films
Linear diffusion impedance. General expression and applications, 126
Titanium
Study of the corrosion behavior of titanium and some of its alloys for biomedical and dental implant applications, 109
Transfer function
Linear diffusion impedance. General expression and applications, 126

Voltammetry
Electrocatalytic reduction of uranium by bacterial cytochromes: biochemical and chemical factors influencing the catalytic process, 96
Lability criteria for metal complexes in micro-electrode voltammetry, 55
Preparation and characterization of Nafion® coated sphere-cap mercury microelectrodes, 48

X-ray photoelectron spectroscopy (XPS)
Electrochemical oxidation of pyrite (FeS_2) in aqueous electrolytes, 116

Z-isomers
Langmuir–Blodgett films of azocrown ethers on electrodes — voltammetric recognition of isomers, 156
